THE ATTIC DOOR COVER THAT PUTS THE LID ON AIR LEAKS

R-50 Battic® Door Attic Stair Cover Insulation Kit Installation Instructions

Photo #1: Battic® Door R-50 Insulation Kit consists of 3 pre-cut pieces of R-25 “encapsulated” fiberglass insulation. Encapsulated means covered with perforated plastic – so no itch or mess. The kit is quickly and easily installed over the Battic® Door Attic Stair Cover in the attic.

Photo #2: Slip the circular-shaped piece of insulation over the Battic® Door. Place the insulation over one end and gently pull over the other two corners. Work the insulation down over the Battic® Door. The insulation will rise above the Battic® Door about 14”.

Photo #3: Install the 2 flat pieces of insulation on the top of the Battic® Door, compressing slightly to install. If desired, packaging tape may be used to seal the top and side pieces together. The Battic® Door is provided with R-50 – the highest insulation level of any kit available!

THANK YOU FOR YOUR PURCHASE OF THE BATTIC®DOOR ATTIC STAIR COVER
